# TMRC 2026

## The 37th Magnetic Recording Conference

### August 03-05, 2026

# EXTENDED CALL FOR NOMINATIONS

The 37th Magnetic Recording Conference will be held at University of California, San Diego on August 03-05, 2026. The focus of TMRC 2026 is **Solid State Magnetic Memory, Storage Architectures for Artificial Intelligence and Recording Technologies for >4 Tbits/in$^2$.**

Approximately 36 invited papers of the highest quality will be presented orally at the conference and will later be published in the IEEE Transactions on Magnetics. Poster sessions will also be held following the oral sessions and will feature posters from the invited speakers and accepted contributed posters. Presenters of invited & contributed papers are encouraged for publication.

## Topics of interest include:

- **Solid State Memory – Devices and Applications**
  - Spin Transfer Torque-Magnetic Random-Access Memory (MTJ cell, MRAM chip manufacturing and roadmap)
  - MRAM– New Physics & Materials (MRAM architecture, VC-MRAM, SOT-MRAM, TI & 2D materials, etc.)
- **Storage Architectures and Applications for AI / ML**
  - In-Memory and Near Memory Compute
  - Advanced Memory Bus Architectures
  - Neuromorphic Computing
- **Advanced Generation Recording Technologies**
  - Energy Assisted Magnetic Recording (HAMR, MAMR, System, Head/Media, HDI and Materials)
  - Alternative Recording Technologies (TDMR, SMR, HIMR, Heated-dot, Tape, All Optical Switching, DNA-storage, etc.)
  - Advanced Magnetic Recording for >4 Tbits/in$^2$ (Readers, Writers, Servo, Tribology, HDI, Signal Processing, Recording Physics, Device Processing, Materials)

To nominate an invited speaker, please complete our online nomination form (preferred) or email the Program Chairs directly. Please submit your proposal by the extended deadline of **April 17th, 2026**.

*TMRC 2026 is sponsored by the IEEE Magnetics Society and co-sponsored by the University of California, San Diego.*
